WORK EXPERIENCE

Software Developer & Founder **Dashly Studio | United Kingdom (Remote) | Jun 2024 – Present**

Overview: Founded and manage a web development studio focused on building custom, high-performance websites for small businesses.

Responsibilities: Developed modern web applications using React, Next.js, and TypeScript, building scalable and maintainable frontend architecture. Integrated REST APIs and handled dynamic data rendering, while implementing state management solutions using Zustand. Optimised performance through Core Web Vitals, lazy loading, and code splitting, and applied SEO best practices to improve visibility and search performance. Built reusable components and improved code structure for scalability, managed deployment, testing, and production releases, and worked directly with clients to translate business needs into effective technical solutions.

Freelance Web Developer **Remote | Jan 2023 – Jun 2024**

Overview: Developed custom web applications and websites for individual clients, focusing on performance, scalability, and clean code.

Responsibilities: Developed custom web applications and websites using React, JavaScript, and modern CSS, focusing on performance, scalability, and clean code. Implemented routing, state management, and REST API integrations, and ensured responsive, cross-browser compatible layouts. Optimised website performance and loading speed, applied SEO best practices to improve visibility, and delivered projects independently from concept to deployment.

EDUCATION

MA BUSINESS MANAGEMENT AND INTERNATIONAL RELATIONS **September 2023 – May 2027**
University of Aberdeen | United Kingdom

BACHELOR'S DEGREE IN PHILOLOGY **September 2020 – June 2024**
Alfred Nobel University | Ukraine
